

Cloud Security Assessment

Cloud computing expands your attack landscape and risk differently.

See Your Cloud Security Stance Clearly

Get the visibility and understanding you need to improve your cloud security posture and address your potential breach landscape.

Converge's seasoned governance, risk, compliance (GRC), and cloud security experts leverage interviews, automated tools, and manual configuration observations to deliver a comprehensive Cloud Security Assessment using our proven methodology.

We review, discover, and evaluate your unique and constantly evolving cloud security posture across public, private, and multicloud services against industry best practices. You will better understand the gaps in your current cloud security processes, services, and configurations and how your organization can prioritize remediation, maximize risk reduction, and achieve cloud security governance.
